

I am an XM satellite radio user and I benefit from using it to check in on the latest local traffic and weather. I am paying ten dollars a month for this service and I do not believe it should be up to the NAC to dictate what I can or cannot pay to listen too. I respectfully urge you to reject the NAB's petition 04-160. The market can and should dictate what is on the air. If FM radio stations provided REAL traffic and weather I'd listen to that but they don't so I pay for it.
Let XM thrive.
